The PA TRS is mandated by the Americans with Disabilities Act of 1990 to provide functionally equivalent telephone services that are available to other U.S. citizens, at no additional cost. The PA TRS includes both traditional relay (devices such as Teletypewriters (TTY) and Telecommunication Devices for the Deaf (TDD) and captioned-telephone voice-carry-over relay services (captioned telephone). 3.13 IntraLATA Toll Presubscription

3.13.1 Toll Presubscription Description

- A. Toll Presubscription is a procedure whereby a customer designates to the Telephone Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs) which the customer wishes to be the carriers of choice for toll calls. Such calls are automatically directed to the designated carrier(s) without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. Toll presubscription does not prevent a customer, who has presubscribed to a toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Telephone Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other services.

An IXC must use Feature GroupD (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Telephone Company. IXCs must submit an Access Service Request (ASR) to the Telephone Company.

Selection of toll presubscription provider by an end user is subject to the terms and conditions following:

3. SERVICE DESCRIPTIONS (Contd.)

3.13 IntraLATA Toll Presubscription (Cont'd)

3.13.2 IntraLATA Toll Provider Nonrecurring Charge

At the option of the IXCs, the nonrecurring charge for a change in intraLATA toll presubscription, as provided herein, may be billed to the IXCs, instead of the end user. This may involve charges resulting from end-user initial free choice Preferred Interexchange Carrier (PIC) changes, as specified herein.

3.13.3 Presubscription Charge Application

1. End user choices for toll presubscription:

Designating an intraLATA and interLATA IXC(s) as primary carrier(s) thereby requiring no access code to access those IXC's service. End users are not required to choose the same IXC for intraLATA and interLATA toll presubscription. Other nonpresubscribed IXCs are accessed by dialing 10XXX, 101XXXX, or other required codes.

Choosing no carrier as primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.

2. If a new customer cannot decide upon presubscription IXCs, the Telephone Company may extend a 30-day period following completion of the initial service request to make a choice without charge. In the interim, the customer will be assigned as a "No-PIC") and must dial an access code to make toll calls.

3. If an IXC elects to discontinue Feature Group, the IXC is obligated to contact, in writing, all end users who have selected the canceling IXC as their preferred toll provider. The IXC must inform the end users that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein. The IXC must provide written notification to the Telephone Company that this activity has taken place.

Following the IXC's discontinuance of service, the Telephone Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance.

3. SERVICE DESCRIPTIONS (Contd.)

3.13 IntraLATA Toll Presubscription (Cont'd)

3.13.3 Presubscription Charge Application (contd.)

4. An unauthorized PIC change is a change in the presubscribed IXC that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process.

If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided at the end of this section. In addition, the IXC will be assessed the applicable charge for returning the end user to the preferred IXC.

3.13.4 Reserved for future use.

3.13.5 End User Charge Discrepancy

1. When a discrepancy is determined regarding an end user's designation of a presubscription IXC, the following applies depending upon the situation described:

- A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Telephone Company.

- When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized records used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines customer choice.

- If an end user denies requesting a change in toll presubscription as submitted by an IXC, and the IXC is unable to produce a letter of authorization, signed by the end user, the IXC will be assessed all applicable change charges. The non-recurring change charges are provided herein. The IXC will also be assessed the presubscription change charge as specified herein, which was previously billed to the end user:

2. Verification of Orders for Telemarketing

Neither the IXC or the Telephone Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has first been confirmed in accordance with the FCC's current anti-slamming practices and procedures.

3.13 IntraLATA Toll Presubscription (Cont'd)

3.13.6 PIC Switchback Option-Business/Residence

PIC Switchback is an option under which no investigation activities are performed by the Telephone Company when an end user denies requesting a change in primary toll carrier submitted by the IXCs. The IXC participating in PIC Switchback will be billed the PIC Switchback Charge, and the presubscription change charge, as specified herein, to switch the end user to the end user's previous carrier.

When the Telephone Company is contacted by an end user who denies requesting a change in primary toll carrier, the end user will be credited the charge assessed for the disputed change in carrier, and will be switched back to the previous IXC at no charge. If this service is made available by the Telephone Company, IXCs may subscribe to or cancel PIC Switchback Service on 30 days notice to the Telephone Company by submitting a written request. A letter of authorization from the IXC will not be requested or accepted at a later date in the event of dispute of the charges assessed under the PIC Switchback option.

This in no way relieves an IXC of the FCC requirements for verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or instituting steps to obtain verification of orders submitted to the Telephone Company.

In addition, the end user has the option of initiating a complaint to the FCC or the Pennsylvania Public Utility Commission's Bureau of Consumer Services concerning unauthorized changes in toll presubscription.

This service enables the customer to initiate a trace of the last incoming call completed by dialing an activation code (*57) immediately after terminating the call, thus enabling the Company's equipment to record the incoming call detail (not the conversation). Call trace information will only be given to law enforcement agencies and not to the subscriber. Incoming call detail includes: The calling number, the time the trace was activated, and in some locations, the time the traced call was received. The customer is required to contact the telephone company business office during normal business hours, which will refer the customer to appropriate law enforcement agencies, or contact the law enforcement agency directly. Call trace detail will be retained by the company and made available to the local law enforcement for ten business days after the trace has been initiated. Only calls from locations with compatible signaling services are traceable using Call Trace. Call Trace is available on a usage sensitive basis only.

3.16 Call Blocking

The Company provides blocking of access to information access telephone service. The Company will not remove blocking of access to information access telephone service without authorization from the Customer. Customers may request that blocking be removed from their lines.

1. The Company shall provide blocking, where technically feasible, at no charge on a one-time basis to all telephone subscribers.
 2. The Company may charge an NRC for each subsequent request for blocking or unblocking pay-per-call services.
 3. A Customer who transfers service to a new location and is served by the same local exchange carrier shall be able to maintain blocking of pay-per-call service without any additional charge to establish blocking at the new location.
 4. Requests by Customers to remove pay-per-call blocking must be in writing to the Company.
